

Product Specification Sheet

Targus ExpressCard™ Notebook Docking Station with Digital Video and Audio Part #: ACP60US

Product Description:

The Targus ExpressCard™ Notebook Docking Station with Digital Video and Audio has a number of features to maximize the capabilities of your workstation. The new ExpressCard™ technology provides a high-speed interface and has the capability to transfer data up to 5 gigabits a second (Five times faster than typical USB 2.0 docking stations). It also includes digital video and audio connections. Two high-speed, "Always On" USB power ports remain powered when the notebook is OFF or disconnected making this function ideal for recharging mice, phones and other devices. Featuring three video modes, this docking station enables the user to set their external monitor as their primary display, simultaneously use both the notebook screen and external monitor for combined viewing or replicate the notebook screen onto their external monitor. Connecting monitors to the docking station is easy, simply plug the monitor directly into the device; no other cables are needed. The ExpressCard™ docking station provides advantages over proprietary OEM ones by offering universal compatibility with a variety of notebooks with an ExpressCard™ slot.

Product Features and Specifications:

-  This is a [Targus global product](#)
- **Security** -Two lock slots allows you to secure docking station to your desk
- **Digital Technology** – Supports digital audio, video and multiple modes display
